SCOPE OF THE REPORT:

This report focuses on the Portable Gas Measuring Instruments in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Portable Gas Measuring Instrument is a kind of equipment used mostly as a part of safety system for detecting presence and leak of various gases in a consigned area. It can be used to detect flammable, combustible and toxic gases and also can be used to detect oxygen depletion.

As of 2015, the chemical application segment of the portable gas measuring instrument is the largest segment of the Germany portable gas measuring instrument market. Increased market share in the hospital is boosting the market. On the other hand, the market value accounted in the year 2015 by the public application segment is approximately 22.36% of the consumption value.

There is an increase in awareness among the industry that even a long term exposure to low concentration of toxic gases can adversely affect workers health. Furthermore, increase in safety for medical and household sector can provide an opportunity for portable gas measuring instrument market growth.

Although the market competition of Portable Gas Measuring Instruments is fierce among these large companies, they can obtain considerable profit from the

manufacturing and marketing of Portable Gas Measuring Instruments. This is the reason that we believe there will also be enterprises enter this market. But it is suggested that enterprises those have plans to enter this industry have careful analysis of this market and the advantages or disadvantages of themselves.

The worldwide market for Portable Gas Measuring Instruments is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
