## **Abstracts**

Quartz surfaces are made from either a natural slab that has been polished or engineered quartz composite. Pure, natural slabs are very expensive and are therefore quite uncommon as countertops. The engineered type is made of 93 to 97 percent ground quartz combined with resins, binders and pigments. This combination is poured into molds and allowed to harden, then finished into the shape and style desired. This type of counter is much more affordable and common than the natural slab.

### **SCOPE OF THE REPORT:**

This report focuses on the Quartz Surfaces in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The major raw materials for quartz surfaces are quartz surfaces sand and resin, etc. Fluctuations in the price of the upstream product will impact on the production cost of quartz surfaces, and then impact the price of quartz surfaces. Additionally, the quality of raw materials would also impact the quality of quartz surfaces. We tend to believe this industry is a rising industry, and the consumption increasing degree will show a smooth growth curve. And the price presents a downward trend according to the economy development status. Also, there will be fluctuation in gross margin.

The worldwide market for Quartz Surfaces is expected to grow at a CAGR of roughly 0.0% over the next five years, will reach 5720 million US\$ in 2023, from 5720 million US\$ in 2017, according to a new GIR (Global Info Research) study.
