Abstracts

Level measurement technology is widely used across many sectors such as construction, industrial, manufacturing, oil and gas, among others. Radar level measurement technology is categorized on the basis of type as non-contacting transmitter and a contacting transmitter. Radar level measurement is based on calculation of time required for completion of trip between the transducer and sensed material level. Radar level transmitters are ideally used for harsh environment where dust, vapor, or a foaming surface prevents the usage of ultrasonic measurement. The radar level transmitters are used for liquids, solids, or interface application. Based on the type of radar, further classification can be done as FM-CW radar, guided wave, CW radar, and pulse radar depending on the respective applications. Radar level measurement technology relies on “echo” signal which is reflected back from the surface. Thus, radar level transmitters provide accurate and reliable results for any liquids and solids under high pressures and temperatures.

SCOPE OF THE REPORT:

This report focuses on the Radar Level Transmitters in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Currently, some companies sell radar level transmitter. The main market players are ABB

Emerson Electric, Siemens, Schneider Electric, Magnetrol International, VEGA Grieshaber KG etc. The global production of radar level transmitter increased from 2357 K Units in 2011 to 2641 K Units in 2015. And it will still increase but not so fast for a long time.

Radar level transmitter is widely used in many industry including oil and gas, pharmaceutical and biotech, power generation, chemicals, food and beverage and other industry. Survey results showed that 14.59% of the Kiosk market is for oil and gas, 32.78% is for Chemicaland 18.92% for Power generation in 2015.

The average price of radar level transmitter will decreased with the decreasing of manufacture cost in the future.

The revenue of radar level transmitter will still increase at a low speed for next five years.

5 North America, EU and Japan are the main production and consumption region of radar level transmitter with their high radar technology.
