Abstracts

A recessed light (also known as can lights or downlight) is a light fixture that is installed into a hollow opening in a ceiling. When installed it appears to have light shining from a hole in the ceiling, concentrating the light in a downward direction as a broad floodlight or narrow spotlight.

Recessed Lighting fixtures are comprised of three main parts, namely, the bulb, decorative trim and the housing.

Recessed lights have remained a favorite choice for modern, streamlined lighting in kitchens, bathrooms, hallways, basements, and in commercial spaces. They are used for both accent and general lighting, and because they are relatively compact, they work wonderfully in small spaces.

This report focuses on the Recessed Lighting in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. At present, in the foreign industrial developed countries the Recessed Lighting industry is generally at a more advanced level, the world's large enterprises are mainly concentrated in Asia.
