Refinery Process Additives market. Refinery process additives (RPA) are the chemicals used to enhance the performance of fuel by meeting the fuel specifications setup by government authorities. These additives are added at the time of refinery process as well as can be used to recuperate the performance of particular end product specification such as diesel or gasoline. The Refinery Process Additives products are used in various refinery processes such as distillation process, reformer system, cracker, coker, filling plant process, catalytic reforming, desulfurization, vacuum distillation and so on. These products are only used by oil and gas industry.

SCOPE OF THE REPORT:

This report focuses on the Refinery Process Additives in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Refinery process additives can be classified based on application process. Primary process refers to crude oil processing, which are mainly atmospheric distillation and vacuum distillation. Distillation processes can be classified as fluid catalytic cracking(FCC), Hydroprocessing etc. in terms reaction type. Crude Oil Processing is the largest application of refinery process additives, with market share of 60.01% in 2016. Main types of refinery process additives used in the sector are scale inhibitors, antifoams, corrosion inhibitors. In FCC process, additives are mainly for product distribution improvement and product quality improvement. Refinery process additives market is a fragmented industry with a tail of manufactures from transnational players to small private companies. The leading producers of refinery process additives used in crude oil processing in the worldwide are BASF, Nalco

Company, GE Water, Cestoil, and Dorf Ketal Chemicals which takes a combined share of 34.11% in 2016. For FCC additive market, the leading suppliers are BASF, Albemarle, Grace Catalysts Technologies and Johnson Matthey (Interact), which are also the largest suppliers of FCC catalyst in the worldwide. The largest sales area of refinery process additives is Europe. North America and China are also major market of refinery process additives.

The worldwide market for Refinery Process Additives is expected to grow at a CAGR of roughly 4.1% over the next five years, will reach 1710 million US\$ in 2023, from 1400 million US\$ in 2017, according to a new GIR (Global Info Research) study.
