Abstracts

An RFID reader, also known as an interrogator, is a device that provides the connection between the tag data and the enterprise system software that needs the information.

The reader communicates with tags that are within its field of operation, performing any number of tasks including simple continuous inventorying, filtering (searching for tags that meet certain criteria), writing (or encoding) to select tags, etc.

The reader uses an attached antenna to capture data from tags. It then passes the data to a computer for processing. Just like RFID tags, there are many different sizes and types of RFID readers. Readers can be affixed in a stationary position in a store or factory, or integrated into a mobile device such as a portable, handheld scanner.

Readers can also be embedded in electronic equipment or devices, and in vehicles.

SCOPE OF THE REPORT:

This report focuses on the RFID Reader in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The Major regions to produce RFID Reader are North America, Europe and China.

North America is the largest production in volume (production share 39.30% in 2016).

RFID Reader is mainly produced by Honeywell, Datalogic and Zebra. And these companies totally occupied above 41.52% market share by sale value in 2016.

Along with the automotive production and ownership, North America, EU, Asia-Pacific are major consumption regions in RFID Reader market. The largest consumption region is North America, accounting for 35.52% market share in 2016 by consumption volume. Asia-Pacific is a promising region to be the fastest developing consumption region in the next few years.

Although sales of RFID Reader brought a lot of opportunities, the industry barrier is rather high and the automotive industry supply chain is rather closed. Therefore, the study group recommends the new entrants who just having money but without technical advantage and downstream support, do not to enter into the RFID Reader field hastily.

The worldwide market for RFID Reader is expected to grow at a CAGR of roughly 14.8% over the next five years, will reach 3400 million US\$ in 2023, from 1490 million US\$ in 2017, according to a new GIR (Global Info Research) study.
