## Abstracts

Running Shoes are footwear designed for off-road travel and include many design features not found on a road-specific model. Running Shoes involve running or walking in an outdoor environment on a natural terrain, taking advantage of the geographical features offered by each region.

### SCOPE OF THE REPORT:

This report focuses on the Running Shoes in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Running events are becoming more popular, and for competition it is even more important than ever to be light on your feet and quick. For this reason running shoes are designed to tackle hard impacts, but are also lightweight and airy.

Currently, the main material of running shoes is mesh fabric, EVA, rubber, glue and others. But different manufacturers will choose raw materials with special functions. The main consumption group is outdoor enthusiasts.

The sales price of Running Shoes keeps fluctuate in past five years owing to the price of raw material and the number of trail runners. The price is at about 80 USD/Pair in recent years. In the next few years, we predict that price will keep to decline.

The global running shoes consuming market will still have a certain amount of growth. The production will reach 197400 K Pairs in 2021. The growth rate will increase at a CARG about 5%. The main consumption regions will be in Europe, North America and China.

The worldwide market for Running Shoes is expected to grow at a CAGR of roughly

5.0% over the next five years, will reach 17200 million US\$ in 2023, from 12800 million US\$ in 2017, according to a new GIR (Global Info Research) study.
