Abstracts

Sacral nerve stimulation (SNS) is a medical electrical stimulation therapy that is used to treat long-term bowel control and bladder control symptoms through the modulation of nerves controlling the lower urinary tract and pelvic floor.

SCOPE OF THE REPORT:

This report focuses on the Sacral Nerve Stimulation Devices in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The external SNS device is one of the fastest growing product segments in the global sacral nerve stimulation market. Although there is just one external device available in the market, it is FDA approved and has the CE mark. However, this device is completely new to the market in APAC as implantable SNS devices are more popular compared with external SNS devices. With the introduction of new SNS devices by companies such as Nuvectra and Axonics Modulation Technologies, this segment is anticipated to have a positive outlook in the coming years.

The hospitals segment was the highest revenue contributing segment in the sacral nerve stimulation market. The complexity of the device, the need for technical expertise, and high procedure cost are some of the factors that will promote the increased adoption of SNS devices in hospitals.

The worldwide market for Sacral Nerve Stimulation Devices is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
