Abstracts

Sebacic acid is a naturally occurring di-carboxylic acid primarily derived from castor oil with the structure $(\text{HOOC}) (\text{CH}_2)_8 (\text{COOH})$. It is a white flake or powdered crystal and resolved in ethanol, ether and soluble slightly in water.

Sebacic Acid is mainly manufactured by splitting of Castor oil followed by fusion with Caustic. It can be used in a number of fields: it can be used to produce engineering plastics, antifreeze plasticizers, solvents, softeners and additives, etc. Moreover, it can also be used as the material of high-temperature lubricants, synthetic lubricant greases, artificial flavors and medical aspects.

SCOPE OF THE REPORT:

This report focuses on the Sebacic Acid in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

China is the largest consumption and export country of sebacic acid in the world in the past few years and it will keep the same position in the next few years. The Chinese market took up about 40% the global market in 2015 while more than 80% of the global export volume is from China. India is another key supplier all around the world. EU, USA and Japan is the key importers at present.
