Abstracts

This report studies the Silyl Modified Polymer market, Silyl modified polymers (SMP, also silane-modified polymers, modified-silane polymers, silane terminated polymers, etc.) are polymers (large, chained molecules) terminating with a silyl group. SMPs are the main components in solvent-free and isocyanate-free sealant and adhesive products. Typically the sealant products manufactured with silyl modified polymers have good adhesion on a wide range of substrate materials, and have good temperature and UV resistance.

SCOPE OF THE REPORT:

This report focuses on the Silyl Modified Polymer in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The Silyl Modified Polymer industry concentration is very high; mainly in Europe and the United States, and high-end products mainly from Japan and USA.

Kaneka, Bostik and Henkel captured the top three sales volume share spots in the Silyl Modified Polymer market in 2017.

Although sales of Silyl Modified Polymer brought a lot of opportunities, for the new entrants with only advantage in capital without sufficient support in technology and downstream channels, the research group did not recommend taking risk to enter this market.

The worldwide market for Silyl Modified Polymer is expected to grow at a CAGR of roughly 6.7% over the next five years, will reach 950 million US\$ in 2023, from 650 million US\$ in 2017, according to a new GIR (Global Info Research) study.
