## **Abstracts**

This report we mainly researched the geocells and geotextiles which used in Slope Stabilisation & Erosion Control Product. Geocells and geotextiles are widely used in construction for erosion control, soil stabilization on flat ground and steep slopes, channel protection, and structural reinforcement for load support and earth retention.

### **SCOPE OF THE REPORT:**

This report focuses on the Slope Stabilisation & Erosion Control Product in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Asia Pacific contributed to over 40% of the global industry in 2015, making it the largest market. This trend is expected to continue over the projected period owing to rising government expenditure for infrastructure development primarily in developing countries including China and India.

On-going projects related to landscape restoration in various developed countries including Japan and U.S. are expected to increase use of geotextiles over the next eight years. The product is employed in projects in other parts of the world such as the transformation of wastewater impoundment into Qingjing Lake located in Singapore. These factors are expected to have a positive impact on the industry over the forecast period.

The worldwide market for Slope Stabilisation & Erosion Control Product is expected to

grow at a CAGR of roughly 8.1% over the next five years, will reach 2270 million US\$ in 2023, from 1420 million US\$ in 2017, according to a new GIR (Global Info Research) study.
