## Abstracts

Smart Gas Meter is a new type measuring instrument, adopting microcomputer program control, automatic compensation of ball valve, other high technology, integrates measuring, prepayment, automatic control and other functions, which can be widely used in measuring control for manufactured gas, natural gas, liquefied gas and other various pipe gases.

### SCOPE OF THE REPORT:

This report focuses on the Smart Gas Meter (Intelligent Gas Meter) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

AMR is the most common type with more than 80% market share in 2016. It was developed initially and is less expensive than AMI, and hence, has the larger market size. The AMI market grew at the highest rate because of its advanced technology. Europe occupied 29.31% of the production market in 2016. It is followed by China and North America, which respectively account for around 25.57% and 23.85% of the global total industry. Other countries have a smaller amount of production. Geographically, North America was the largest consumption market in the world, which took about 27.46% of the global consumption volume in 2016, but Europe would account for the largest market in 2022.

For price trend analysis, a key variable in the performance of Smart Gas Meter producers is raw material costs, specifically the speed at which any increase can be passed through to customers.

For forecast, the global Smart Gas Meter revenue would keep increasing with annual

growth rate with 3~8%. We tend to believe that this industry still has a good future, considering the current demand of Smart Gas Meter.

The worldwide market for Smart Gas Meter (Intelligent Gas Meter) is expected to grow at a CAGR of roughly 5.2% over the next five years, will reach 3210 million US\$ in 2023, from 2370 million US\$ in 2017, according to a new GIR (Global Info Research) study.
