Abstracts

Sodium Chloride Injection, which is mostly the 0.9% sodium chloride water, also called as normal saline. It is a colorless, clear liquid. And it is sterile and no pyrogenic. They are parenteral solutions containing various concentrations of sodium chloride in water for injection intended for intravenous administration. Main ingredient of sodium chloride injection is sodium chloride. Sodium chloride is an electrolysis supplement agent. Sodium and chloride are important electrolysis for the human body and mainly exist in extracellular fluid, which play an important role in maintaining normal volume of blood, and extracellular fluid and osmosis pressure.

SCOPE OF THE REPORT:

This report focuses on the Sodium Chloride Injection in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. In the last several years, the development of global sodium chloride injection market is stable at an average growth rate of 3.17% (Revenue).

In 2015, China is the largest supplier and consumption market of sodium chloride injection with market share of 33.62% due to the largest population. Following China, both Europe and USA occupied market share more than 20%.

In recent years, the price of sodium chloride injection is decreasing slowly due to the decrease of raw materials cost. The cost decrease of plastic bottles is much larger than glass bottle. While the flexible bag sodium chloride injection is still much more expensive than the former two.

In China, thanks to the policies published, the price of sodium chloride injection and other pharmaceuticals are asked to decrease. In addition, the government also argued

the market concentration degree should be higher.

In the global market, the market concentration degree is higher and higher. The market share unlisted companies occupied is lower and lower. With the development of technology, the flexible bag sodium chloride injection will be more and more.

The worldwide market for Sodium Chloride Injection is expected to grow at a CAGR of roughly 3.1% over the next five years, will reach 2450 million US\$ in 2023, from 2030 million US\$ in 2017, according to a new GIR (Global Info Research) study.
