Abstracts

Sodium selenite is a chemical form of selenium, which is a mineral that naturally exists in the crust of the earth. This supplement is an inorganic combination of selenium, oxygen, and sodium.

SCOPE OF THE REPORT:

This report focuses on the Sodium Selenite in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Sodium selenite is a colorless toxic solid. Because selenium is an essential element, it is mainly used in feed additives and food industry. Also, it is mainly used in the manufacture of colorless glass. Owing to its toxicity, it is forbidden in Japan and some Europe countries for food ingredient. Japan had just allowed sodium selenite use in feed additives.

Raw material of sodium selenite are selenium dioxide (or crude selenium powder) and sodium hydroxide. Also it pollutes environment during the production. During past five years, price of sodium selenite decreased since price of sodium powder had decreasing.

There are only a few manufacturers all over the world, such as II-VI, Retorte, Orffa, Vital, Jinhua and Ahpstar. Downstream demand for sodium selenite seems steady those years. So, we speculate that there will not be too many manufacturers entering this industry in the future.

The worldwide market for Sodium Selenite is expected to grow at a CAGR of roughly 16.7% over the next five years, will reach 73 million US\$ in 2023, from 29 million US\$ in

2017, according to a new GIR (Global Info Research) study.
