## Abstracts

This report studies the Solder market, a metal or metallic alloy used when melted to join metallic surfaces; especially: an alloy of lead and tin so used

### SCOPE OF THE REPORT:

This report focuses on the Solder in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

China and North America are the major production bases of solder. The two regions contributed about 72% share in the global production market in 2017. In addition, China keeps its No 1 position in the recent years, of which production reached to 131 K MT in 2017. The industry is relatively scattered. Kester, Henkel, AIM, KOKI, Alpha Assembly Solutions and so on are the leading producers in the solder market.

As for consumption, Asia-Pacific and North America are the major consumers as well. The two regions consumed about 165 K MT and 18 K MT respectively, with a total share of 87% in the consumption market in 2017.

Although China has become the largest producer of solder, when considering the performance, the manufacturers in the country still have an obvious gap compared with those from European and American regions. Chinese solder manufacturers should be dedicated to performance improvement. As for the future market, considering its applications and downstream industries development, market insiders think that the global solder market will keep increasing with the GACR of 2.35% during the period of 2017-2022, accompanied with fierce competition as well as price fluctuations.

The worldwide market for Solder is expected to grow at a CAGR of roughly 0.3% over

the next five years, will reach 5900 million US\$ in 2023, from 5800 million US\$ in 2017, according to a new GIR (Global Info Research) study.
