SCOPE OF THE REPORT:

This report focuses on the Solder Paste in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Currently China has become international solder paste large consumption country, but the production technology is relatively laggard, the manufacturers can only produce some low-end product, although after 2010 the new production lines is expanding, the technology is still relying on import.

The solder paste is mainly used in printed circuit board, integrated circuit package, which widely used in the electronics industry. As the electronics industry develops, there is a growing demand to increase the package density of components on a substrate. Along with this, performance and quality requirements for solder pastes have become more demanding.

Solder Paste industry is a low concentration industry. As electronic foundry industry transfer to China mainland, many new entrants enter into this industry, and small enterprises accounted for a large part of the market.

The worldwide market for Solder Paste is expected to grow at a CAGR of roughly -6.7% over the next five years, will reach 370 million US\$ in 2023, from 570 million US\$ in 2017, according to a new GIR (Global Info Research) study.
