Abstracts

Spray gun is a small, air-operated tool that sprays various media including ink and dye, but most often paint by a process of nebulization. Spray guns were developed from the airbrush and are still considered a type of airbrush.

SCOPE OF THE REPORT:

This report focuses on the Spray Gun in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

As international economic situation is complicated, in the next few years there will be many uncertainties. Due to the government' policy and the high sales of spray gun in the international market, the current demand for spray gun product is relatively stable in the mature market, such as North America and Europe, but the demand in China is relatively higher due to the downstream demand.

Spray gun is mainly manufactured and sold by Finishing Brands, Exel, Graco and ANEST IWATA; and these companies occupied about 43.31% market share in 2016. Geographically, China is the largest sales market in the world, which took about 27.27 percent of the global consumption volume in 2016. But North America shared 31.19% of global total sales revenue.

Although sales of spray gun brought a lot of opportunities, the study group recommends the new entrants who just having money but without technical advantage and downstream support, do not to enter into the spray gun field hastily.

The worldwide market for Spray Gun is expected to grow at a CAGR of roughly 2.7% over the next five years, will reach 1470 million US\$ in 2023, from 1250 million US\$ in

2017, according to a new GIR (Global Info Research) study.
