Abstracts

Styrene maleic anhydride (SMA) is a synthetic polymer that is built-up of styrene and maleic anhydride monomers. The polymer is formed by a radical polymerization, using an organic peroxide as the initiator. The main characteristics of SMA copolymer are its transparent appearance, high heat resistance, high dimensional stability, and the specific reactivity of the anhydride groups. The latter feature results in the solubility of SMA in alkaline (water-based) solutions and dispersion.

SCOPE OF THE REPORT:

This report focuses on the Styrene-Maleic Anhydride Copolymer in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

SMA resin has excellent performance, so in the automotive sector has been widely used; it also develops quickly in the field of powder coatings and leather products quickly. So it will show steady growth trend in the next few years, the study group estimates compound annual growth rate will reach about 4.2% in the next few years. SMA resins are mainly produced by styrene and maleic anhydride; they are common chemicals, while global supply is adequate.

The world's major producer of SMA resins concentrates in Europe and the United States, the two regions are also the largest consumers, while in the Asia Pacific region, the application of SMA resin is still in its infancy, especially in China, the annual consumption is about 1200MT, is far below the average level in Europe and America. In recent years the price of SMA resins impacted by the market of raw materials, prices showing a declining trend, but not much. However, due to high manufacturing technical

barriers, manufacturer's gross margin has obvious advantages compared to conventional resins.

The worldwide market for Styrene-Maleic Anhydride Copolymer is expected to grow at a CAGR of roughly 3.8% over the next five years, will reach 150 million US\$ in 2023, from 120 million US\$ in 2017, according to a new GIR (Global Info Research) study.
