## **Abstracts**

A terminal blocks is a type of electrical connector which is commonly used in Business Equipment, HVAC (Heating, Ventilating & Air Conditioning), Power Supplies, Industrial Controls, Instruments, Telecom Equipment and Transportation Equipment.

### **SCOPE OF THE REPORT:**

This report focuses on the Terminal Blocks in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The decline in the connector industry in 2015 was also felt by terminal block manufacturers.

The largest threat to the Terminal Blocks brand of United States currently is the Original Equipment Manufacture from Asia. They may select to manufacture their own products that are similar to original brand. It will increase competition among companies in this industry, principally located in or originating from the Asia Pacific region, offering very low cost products by direct copies, counterfeits products, etc. It will lead to market pricing pressure, customer dissatisfaction and harm to reputation and brand name.

The worldwide market for Terminal Blocks is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
