Abstracts

Tetraethyl orthosilicate (TEOS) is the chemical compound with the formula $\text{Si}(\text{OC}_2\text{H}_5)_4$. Often abbreviated TEOS, it is a colorless liquid that degrades in water. TEOS is the ethyl ester of orthosilicic acid, $\text{Si}(\text{OH})_4$. TEOS is mainly used as a crosslinking agent in silicone polymers and as a precursor to silicon dioxide in the semiconductor industry and as the silica source for synthesis of zeolites.

SCOPE OF THE REPORT:

This report focuses on the Tetraethyl Orthosilicate in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The tetraethyl orthosilicate market is relatively fragmented. A number of manufacturers of different scales are focusing on this market. Deficiency of raw materials and limited applications were used to be the obstacle in this industry. Consequently, only limited companies are able to produce high purity tetraethyl orthosilicate by their own technology. For now, the market of tetraethyl orthosilicate is quite competitive.

Regionally, China is the biggest production base of tetraethyl orthosilicate, and the market share of EU is also considerable. Manufacturers in US are less, but with leading market share in global market.

As a kind of advanced material, the production of tetraethyl orthosilicate highly relies on the downstream demand. Silicone rubber is the biggest market of tetraethyl orthosilicate, which takes more than 27 % of total tetraethyl orthosilicate production in last year.

The worldwide market for Tetraethyl Orthosilicate is expected to grow at a CAGR of

roughly 5.3% over the next five years, will reach 300 million US\$ in 2023, from 220 million US\$ in 2017, according to a new GIR (Global Info Research) study.
