## Abstracts

Texture paint is a specialty paint that will hold textured designs, like stippling, even after it is dry. This paint comes in several different varieties which are smooth, sand, or coarse. Coarse has a popcorn effect and is often used as a ceiling paint. Always look for paint that will give you the longest drying times for your experience level. The longer the drying time, the more opportunity you'll have to work the paint into a dramatic effect or correct any imperfections before it sets.

### SCOPE OF THE REPORT:

This report focuses on the Texture Paint in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Texture painting refers to the textured feature that is embossed on the facet of commercial or residential structure to create an elegant outlook. Texture paint is a specific category in the global paint industry which uses coarse grain consisting usually of gypsum and sand with water-thinned binder into its formulation and used for creating a rough patterned effect on a wall. Growing demand for the paints and increasing spending on home decoration in the developing economies and expected economic rebound in developed nations is expected to be the key growth driver for texture paints during the period of study.

Geographically, North America dominates the texture paints market driven by higher demand texture paints from residential applications due to higher spending on home decoration applications in the region. North America was followed by Asia-Pacific and Europe as second and third largest markets for the texture paints market. Asia Pacific is projected to have the fastest growth, owing to rapidly growing construction industry and

increasing spending by middle class families due to increased disposable income, especially in developing nations such as China and India in this region.

The worldwide market for Texture Paint is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
