Abstracts

A thin Light Box is a box housing a light bulb that illuminates the image from behind in order to create a high contrast image. With a consistent uniformity of light that is projected through thin a translucent piece of glass, shadows and uneven lighting are eliminated. It is used for situations where a shape laid upon the surface needs to be seen with high contrast.

SCOPE OF THE REPORT:

This report focuses on the Thin Lightbox in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. LED Thin Light Box is the most common type with more than 70% market share, while EEFL Thin Light Box and T4 fluorescent bulb Thin Light Box have smaller market share at with 20.42% and 8.24% respectively in 2015. EEFL Thin Light Box is more expensive but it can save energy, so it can be predicted that this type will account for larger market. Thin Light Box industry is not a relatively concentrated market, the top one company accounts for about 8% of sales volume. And other companies account for no more than 6%. There are many small companies in the world so the market share of other companies is more than 40%. North America is the largest market in the world with 35% of the market. China has been developing this industry quickly and becomes the second largest market at about 25%. The sales volume of Europe is a bit smaller than China with 20% of the market. In terms of production,

The worldwide market for Thin Lightbox is expected to grow at a CAGR of roughly 2.1% over the next five years, will reach 350 million US\$ in 2023, from 310 million US\$ in

2017, according to a new GIR (Global Info Research) study.
