## **SCOPE OF THE REPORT:**

This report focuses on the Tire Vulcanizer in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The marketization degree enhances unceasingly for Tire Vulcanizer market in recent years, most of electroacoustic company has been involved in international competition. Due to both the electro-acoustic industry technology intensive and labor intensive industry characteristics, Tire Vulcanizer manufacturing is undergoing a massive industrial transfer in the international scope. Production center has been transferred from Europe, USA, Japan to China. However, affected by the policy, China's market share decreased in recent years. Relatively speaking, Europe and Japan are relatively stable. The Entry Barrier of that industry is relatively high, as a consequence, there is a comprehensive obstacle in technology strength, certification, economies of scale and cost control ability, etc. As the hydraulic curing press accelerates its replacement of mechanical curing press, the latter's capacity utilization is lower than the former's in China. In the future, hydraulic curing press will completely replace mechanical curing

press, whose capacity will gradually be eliminated.

The worldwide market for Tire Vulcanizer is expected to grow at a CAGR of roughly 1.5% over the next five years, will reach 1470 million US\$ in 2023, from 1340 million US\$ in 2017, according to a new GIR (Global Info Research) study.
