Abstracts

A trencher is a piece of construction equipment used to dig trenches, especially for laying pipes or cables, for installing drainage, or in preparation for trench warfare. Trenchers may range in size from walk-behind models, to attachments for a skid loader or tractor, to very heavy tracked heavy equipment.

SCOPE OF THE REPORT:

This report focuses on the Trencher in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. First, the trencher industry concentration is high. North America is the biggest producer and consumer of trencher. There are no more than fifty manufacturers in the world, and high-end products mainly come from USA and European.

In the world wide, giant manufactures mainly distribute in Europe and America. American and Europe has a long history and unshakable status in this industry, like Ditch Witch, Vermeer and Tesmec. They have perfect products.
