Abstracts

A triazine is class of nitrogen-containing heterocycles. The parent molecules' molecular formula is $C_3H_3N_3$. They exist in three isomeric forms, 1,3,5-triazines being common.

MMA Triazine is a cyclic tertiary triamine. It is mainly used as a scavenger for sour gases like H_2S and mercaptans in gaseous or liquid hydrocarbon streams.

MEA-triazine is the most commonly used chemistry for applications requiring a non-regenerative H_2S scavenger. Other chemistries are available (MMA-triazine, glyoxal, zinc-based, iron-based, and others) but MEA-triazine has the highest market share because it is the lowest cost in use solution. Triazines are low cost in use despite the fact that the molar efficiency of the chemistry in capturing H_2S is significantly below theoretical maximum efficiency.

SCOPE OF THE REPORT:

This report focuses on the Triazine in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

For production, the NA consumption of triazine has reached 49 K MT by the end of year 2017, with annual growth rate around 1.5% during the past years. Growing attention has been raised in the application of triazine in medical and oil and gas industry, which makes it in fast development in recent years.

For the market, the global triazine market is worth over 157.54 Million USD, according to our survey. Actually, the market of triazine is far from mature. However, as production of raw materials like palm and coconuts are limited to Southeast Asia, the competition structure would not change significantly in the following years.

For price trend analysis, a key variable in the performance of triazine producers is raw

material costs, specifically the speed at which any increase can be passed through to customers.

The worldwide market for Triazine is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
