Abstracts

Trichloroisocyanuric acid is a kind of organic compound. It is a white crystalline powder or granular solid, and has a strong chlorine pungent taste. Trichloroisocyanuric acid is easy to decompose in acid or alkali. Trichloroisocyanuric acid bactericidal performance is excellent. It becomes the new generation of broad spectrum, high efficiency, and low toxicity fungicides, bleach and shrink agent.

SCOPE OF THE REPORT:

This report focuses on the Trichloroisocyanuric Acid in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The consumption regions concentrate on China and North America market, which shares about 53 percent of the global consumption in past five years. However, because of the limited of native policy, the production of North America is less than the consumption. Then the import volume is higher than the production of North America. Then the product price of North America and Europe is obviously higher than that of China.

The main application of trichloroisocyanuric acid is water treatment, driven primarily by strong demand in disinfectant in North America and Asia regions. As in this and other applications, the market share is relatively stable.

The worldwide market for Trichloroisocyanuric Acid is expected to grow at a CAGR of roughly 10.5% over the next five years, will reach 4170 million US\$ in 2023, from 2290 million US\$ in 2017, according to a new GIR (Global Info Research) study.
