Trunking System here refers to LED Trunking Systems. Trunking System is an energy-efficient, low maintenance alternative to traditional linear fluorescent in a variety of industrial, commercial and light assembly applications. It is the optimal solution for conventional lighting systems and also excellent for new installations due to its low installation cost ? everything in one box and installation is tool-less. It saves both time and costs when updating lighting systems. LED trunking system distributes the elegant and uniform light according to different applications like supermarket, retail places, warehouses, offices, lecture halls, play courts, gymnasium, workshops, car parks etc.
