UAVs are controlled remotely either by a pilot at a ground station or by onboard computers. Payloads are one of the major components in UAVs. These payloads consist of various equipment and systems depending on their specific mission requirement.

SCOPE OF THE REPORT:

This report focuses on the UAV Payload and Subsystems in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. At present, the cameras and sensors segment dominates this market and is estimated to retain its hold over the UAV subsystems market until the end of 2023. The emergence of miniaturized UAVs and drone cameras will be one of the major factors driving the UAV cameras and subsystems market during the forecast period. During the forecast period, the Americas is estimated to be the largest market for UAV payload and subsystems. In this region, the US is the market leader in the global UAV and associated component market in terms of demand and manufacturing. It is also the largest operator of military-grade remotely pilot aircraft across the globe. Factors such as the increasing need for surveillance and security operations will result in the growth of the UAV subsystems market in this region during the forecast period.

The worldwide market for UAV Payload and Subsystems is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
