Abstracts

Underground Mining Equipment is the mining equipment used in the underground. Underground mining is a technique used to access ores and valuable minerals in the ground by digging into the ground to extract them.

SCOPE OF THE REPORT:

This report focuses on the Underground Mining Equipment in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Underground mining involves mineral production by extracting natural resources such as metals, coal, and minerals, including iron ore, titanium, bauxite, and copper, and various non-metallic products from beneath the earth's surface. The mining methods required for underground extraction are selected based on parameters such as geographical conditions, spatial and geometric characteristics, the economic value of ore, estimated operational costs, and availability of raw materials. Globally, APAC region generates the highest consumption value, followed by the North America, Europe, South America and Africa. The growing mining activities in developing countries of APAC such as China, India, and Australia, are the major factors influencing the growth of the market. Also, the growing demand from coal industry will drive the underground mining equipment market.

The coal mining sector was the highest revenue generator with over 40.21% market share in 2016, and this growth will continue through the forecast period. The energy industry is a significant end-user of mined coal products, as coal being a vital resource for energy production. Also, following the rapid growth in urbanization and industrialization, the demand for power generation has increased, thus triggering coal

mining activities.

The worldwide market for Underground Mining Equipment is expected to grow at a CAGR of roughly 6.9% over the next five years, will reach 24100 million US\$ in 2023, from 17300 million US\$ in 2017, according to a new GIR (Global Info Research) study.
