Abstracts

Universal grease is a semisolid lubricant applied to ordinary temperature range and general conditions in mechanical equipment, automobile, etc.

Universal grease is a mixture of three main components: lubricating fluid, performance enhancing additives, and thickener.

SCOPE OF THE REPORT:

This report focuses on the Universal Grease in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The technical barriers of universal grease are relatively low, resulting in low level concentration degree. The manufacturing bases scatter around the world, mainly concentrating in India, China, Japan and USA. The key companies in universal grease market include Shell, Exxon Mobil Corporation, Castrol, Chevron, Total, Fuchs, SKF, Southwestern Petroleum Corporation, CNPC, and Sinopec.

In the past few years, the price of universal grease decreased and we expect the price has pressure to increase in short time. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of universal grease. Therefore, to some extent, the companies face the risk of profit decline.

The worldwide market for Universal Grease is expected to grow at a CAGR of roughly 4.0% over the next five years, will reach 760 million US\$ in 2023, from 600 million US\$ in 2017, according to a new GIR (Global Info Research) study.
