Abstracts

Urea, also known as carbamide, is an organic compound with chemical formula $\text{CO}(\text{NH}_2)_2$. This amide has two $-\text{NH}_2$ groups joined by a carbonyl ($\text{C}=\text{O}$) functional group.

Urea serves an important role in the metabolism of nitrogen-containing compounds by animals and is the main nitrogen-containing substance in the urine of mammals. It is a colorless, odorless solid, highly soluble in water, and practically non-toxic (LD_{50} is 15 g/kg for rats). Dissolved in water, it is neither acidic nor alkaline. The body uses it in many processes, most notably nitrogen excretion. The liver forms it by combining two ammonia molecules (NH_3) with a carbon dioxide (CO_2) molecule in the urea cycle.

Urea is widely used in fertilizers as a source of nitrogen and is an important raw material for the chemical industry.

SCOPE OF THE REPORT:

This report focuses on the Urea in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Raw Materials are important component, occupying for the most proportion of cost. It's important and necessary to attach importance to raw materials sourcing.

In general, the raw materials need to outsourcing, and the price, on-time rate and quality are very key indicators, to keep competitive market position, to maximize the profit.

Actually, the price, on-time rate or quality, is just one of key factors to influence on the supply capacity and competitiveness. The lowest total production cost is the total index to maximize the profit.

To a producer, can control the total production cost through worldwide procurement, localization procurement and concentrative purchase, more purchasing focuses on fewer suppliers to large-scale purchase, to large-scale and high efficiency. Now the logistics and information is well-developed, beneficial to worldwide procurement, localization procurement and concentrative purchase. In future, more manufacturers will attach importance to the raw materials purchasing, with strategic sourcing.

Consumers are generally quick-change, to get or use newfangled products, better experience, better convenience and more quicker; to find and meet the needs of consumers, and exceeding expectation, better service.
