UV Laser is a device which emits the light in UV range. It has become the mainstream work horse in the industrial revolution. From research and development to biotechnology and beyond, UV Lasers is the backbone to manufacturing most of today's consumer goods.

SCOPE OF THE REPORT:

This report focuses on the UV Lasers in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. As for the global UV laser industry, the industry structure is relatively stable. The top three manufacturers have 44.84% revenue market share in 2015. The USA giant Coherent, which has 17.44% market share in 2015, is the leader in the UV laser industry. The manufacturers following Coherent are Rofin and Spectra-Physics, which respectively has 14.80% and 12.59% market share globally. The Huaray Laser is the leader of China UV laser industry.

The downstream industries of UV laser products are marking, cutting and drilling. In the recent years, with the recovery of global economic, the development of emerging countries and the spurring of individual spending, the consumption increase of UV laser will be obvious. In the foreseeable future, the UV laser products will show an optimistic upward trend.

Although sales of UV laser products bring a lot of opportunities, the study group recommends the new entrants who just have money but without technical advantage, raw materials advantage and downstream support, do not enter into the UV laser field hastily.

The worldwide market for UV Lasers is expected to grow at a CAGR of roughly 10.0% over the next five years, will reach 400 million US\$ in 2023, from 230 million US\$ in 2017, according to a new GIR (Global Info Research) study.
