Abstracts

This report studies the Venous Stents market. Venous stents are metal mesh tubes that expand against blocked or narrowed vein walls. They act as a scaffold to keep veins open. In most cases, surgeons place venous stents in larger, central veins, such as those found in the legs, chest and abdomen.

SCOPE OF THE REPORT:

This report focuses on the Venous Stents in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. For a long time, there was only the Wallstent (Boston Scientific) being FDA approved for deep venous treatment in the United States, which means there is only one official player Boston Scientific selling venous stents in United States market. At present, there are at least 3 potential venous stents players planning to enter the United States market with stents in clinical trials in the United States. The 3 potential venous stent products are Venovo venous stent (Bard), Vici venous system (Veniti) and Zilver Vena venous stent (Cook). Other venous stent players in the international market are Optimed and Medtronic.

The worldwide market for Venous Stents is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
