Abstracts

An orthopedic implant is a medical device manufactured to replace a missing joint or bone or to support a damaged bone. The medical implant is mainly fabricated using stainless steel and titanium alloys for strength and the plastic coating that is done on it acts as an artificial cartilage. Internal fixation is an operation in orthopedics that involves the surgical implementation of implants for the purpose of repairing a bone. Among the most common types of medical implants are the pins, rods, screws and plates used to anchor fractured bones while they heal.

SCOPE OF THE REPORT:

This report focuses on the Veterinary Orthopedic Implants in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The veterinary orthopedic implants market is very concentrated market; the revenue of top ten manufacturers accounts about 77% of the total revenue in 2016. The high-end products mainly come from Japan, USA and Europe.

Innovation and promotion of veterinary healthcare projects has led to the increasing demand for veterinary orthopedic implants. Increasing veterinary healthcare projects across the global, especially in the Asia Pacific, is another major factor, driving the growth of the veterinary orthopedic implants market during the forecast period.
