SCOPE OF THE REPORT:

This report focuses on the VHF Air-ground Communications Stations in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

VHF Air-ground Communications Stations product demand is in a certain space, and the main consumer countries are moderately developed countries and developed countries

Despite the presence of competition problems, due to the global recovery trend is clear, investors are still optimistic about this area; the future will still have more new investment enter the field.

In the last few years, the total number of new type of VHF Air-ground Communications Stations developed by domestic manufacturers is limited. This shows that the efforts to develop new product in China is not enough, but also shows that the allocation space of domestic VHF Air-ground Communications Stations still need to expand. There is still a big gap compared with the imported VHF Air-ground Communications Stations.

As large demand of high-end products at home and abroad, many companies began to enter the field of high-end. Currently, the Chinese VHF Air-ground Communications Stations industry needs to transit to high-end products, this industry still has considerable development prospects in China.

The worldwide market for VHF Air-ground Communications Stations is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
