## Abstracts

A water bottle is a container that is used to hold water, liquids or other beverages for consumption. The use of a water bottle allows an individual to transport beverage from one place to another. A water bottle is usually made of plastic, glass, or metal. Water bottles are available in different shapes, colors and sizes.

### SCOPE OF THE REPORT:

This report focuses on the Water Bottles in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The extremely diversified market for reusable water bottles, encompassing numerous product varieties in terms of material, size, shape, and designs, features presence of a large number of water bottle manufacturers vying for a share in the United States market through the introduction of innovative products. The trends of increased usage of BPA-free materials and rising adoption of smart bottles are expected to have a profound influence on the overall development of the market in the next few years.

The worldwide market for Water Bottles is expected to grow at a CAGR of roughly 3.7% over the next five years, will reach 2630 million US\$ in 2023, from 2110 million US\$ in 2017, according to a new GIR (Global Info Research) study.
