Abstracts

Water Desalination Equipment refers to devices designed to desalinate both brackish or sea water, in order to produce high quality potable, industrial water, etc. In water desalination process, there are mainly two methods, namely Multi-Stage Flash (MSF) and Reverse Osmosis (RO) method.

SCOPE OF THE REPORT:

This report focuses on the Water Desalination Equipment in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Overall, the Water Desalination Equipment products performance is positive with the global economic recovery.

The technical barriers of Water Desalination Equipment are not high, and the Water Desalination Equipment production concentrated large companies including GE WaterDoosan Heavy Industries, Acciona, Genesis Water Technologies, Koch Membrane Systems, Degremont Sas, IDE Technologies, Veolia, Hyflux, Biwater and others. They are mainly located in USA, UK, and South Korea.

As the demand increases rapidly for downstream industries, the demand for Water Desalination Equipment will correspondingly increase. The increased consumption of Water Desalination Equipment is expected to continue during the remaining years of the forecast. Water Desalination Equipment industry will usher in a rapidly growth space. In the past few years, the price of Water Desalination Equipment gradually decreased and expected the price will not increase with the production released. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of Water Desalination

Equipment. Therefore, to some extent, the companies face the risk of profit decline.

There are companies adding new capacities and aims at the cost and quality leadership which shall improve profitability. As the same time, companies are focusing on technological innovation, equipment upgrades, and process improvements, to reduce costs and improve quality. The competition in Water Desalination Equipment market will become more intense.

The worldwide market for Water Desalination Equipment is expected to grow at a CAGR of roughly 15.5% over the next five years, will reach 32100 million US\$ in 2023, from 13500 million US\$ in 2017, according to a new GIR (Global Info Research) study.
