X-ray detectors are devices use a scintillator to convert x-rays into visible light. They are used to measure the flux, spatial distribution, spectrum, and/or other properties of X-rays.

SCOPE OF THE REPORT:

This report focuses on the X-ray Detectors in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Asia is poised to be the fastest-growing region during the forecast period. The high growth in this market is attributed to the growing geriatric population, growing adoption of digital imaging systems, rising disposable income, growing number of awareness programs and symposia, and growing venture capital investments driving growth in the Asian market. However, High initial cost of Digital X-ray systems and stringent regulatory procedures for product launch may hinder the growth of this market during the forecast period. Meanwhile, the development of CMOS technology will improve the X-ray Detectors industry.

The worldwide market for X-ray Detectors is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
