Abstracts

Zirconium oxide (also known as zirconia or as zirconic anhydride, ZrO_2) is a toxic white powder that is insoluble in water but soluble in mineral acids. Its most naturally occurring form, with a monoclinic crystalline structure, is the mineral baddeleyite. The dopant stabilized cubic structured zirconia, which is synthesized in various colors, is mainly used as a gemstone and a diamond simulant.

SCOPE OF THE REPORT:

This report focuses on the Zirconium Oxide in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The zirconium oxide industry concentration is relatively high; there are not so many manufacturers in the world. The giant manufactures mainly distribute in American and Europe. American has a long history and unshakable status in this industry, such as Zircoa, has perfect products. As to France, the Imerys has become a global leader. In Japan, it is Showa Denko that leads the technology development. In China, the manufactures focus in Anhui, Fujian and Henan province.

Many companies have several plants, usually close to aimed consumption market.

There are international companies set up factories in China too, such as Imerys and Saint-Gobain, who have plants in China. Some companies usually take a joint venture enter into aim market such as some American and Japanese companies.

Company mergers and acquisitions, and inter-companies cooperation have occurred for development and growth. As the downstream consumption usually follows with

developed and rapid economic growth areas, the developed areas? company prefers investing to underdevelopment regions these years.

The worldwide market for Zirconium Oxide is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
