Abstracts

This report studies the Power Take-off market, from angles of players, regions, product types and end industries, to analyze the status and the future. Power take-off (PTO) is a device that transfers an engine's mechanical power to another piece of equipment. A PTO allows the hosting energy source to transmit power to additional equipment that does not have its own engine or motor. For example, a PTO helps to run a jackhammer using a tractor engine. PTOs are commonly used in farming equipment, trucks and commercial vehicles.
