According to our (Global Info Research) latest study, the global NSAID API market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Active pharmaceutical ingredients (APIs) are bulk drug products that are used as raw materials for formulations. Nonsteroidal anti-inflammatory drugs (NSAIDs) are a drug class that groups together drugs that provide analgesic (pain-killing) and antipyretic (fever-reducing) effects, and, in higher doses, anti-inflammatory effects.

North America dominated the global NSAID API market due to high demand for APIs in drug formulations and research and development programs in this region. The region is expected to continue its dominance in the coming years owing to increasing preference for generic medicines as a result of high healthcare costs in the U.S. Among other regions, Asia-Pacific is the next largest market for APIs. This region has become the most attractive market due to clustering of a large number of generic medicine manufacturers.

The Global Info Research report includes an overview of the development of the NSAID API industry chain, the market status of Captive Manufacturing (Paracetamol, Ibuprofen), Contract Manufacturing (Paracetamol, Ibuprofen), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of NSAID API.

Regionally, the report analyzes the NSAID API markets in key regions. North America and Europe are experiencing steady growth, driven by government initiatives and increasing consumer awareness. Asia-Pacific, particularly China, leads the global
