Abstracts

N-terminal pro b-type natriuretic peptide (NT-proBNP) is peptide (small proteins) continually produced in small quantities in the heart and released in larger quantities when the heart senses that it needs to work harder. This supports fluid retention and volume expansion in the arteries and veins. Subsequently, the heart muscle is stretched and works hard to pump blood under normal resting condition. NT-proBNP Fast Test Kit (Immunofluorescence Assay) is intended for in vitro quantitative determination of N-terminal B-type natriuretic peptide precursor (NT-proBNP) in human serum, plasma or whole blood samples. This test is used as an aid in the clinical diagnosis, prognosis and evaluation of Heart Failure (HF).

This report studies the global NT-proBNP Test Kit production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for NT-proBNP Test Kit, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2021 as the base year.
