NTEP (National Type Evaluation Program) certified scales are weighing scales that have been tested and approved by the National Conference on Weights and Measures (NCWM) to ensure their accuracy and compliance with legal standards. These scales are commonly used in commercial applications where weight measurements are required for trade or legal purposes.

NTEP certification ensures that the scales meet specific criteria regarding accuracy, reliability, and performance. The certification process involves rigorous testing and evaluation by independent laboratories to verify that the scales meet the requirements set by the NCWM.

NTEP certified scales are commonly used in industries such as agriculture, manufacturing, shipping and logistics, food processing, and retail. They are used for various applications, including weighing products, ingredients, livestock, and other items that require precise and accurate weight measurements.

Using NTEP certified scales provides assurance that the weight measurements obtained are accurate and reliable, which is crucial for businesses involved in trade and commerce. It also helps to ensure fairness and transparency in commercial transactions, as both buyers and sellers can trust the accuracy of the weight measurements provided by these certified scales.
