Abstracts

Valves are devices that regulate, direct or control the flow of a fluid (gases, liquids, fluidized solids) by opening, or partially obstructing various passageways. Valves are used in many applications throughout the industrial, commercial, and residential industries. Nuclear valves refer to the valves especially applied in nuclear power plants.

Scope of the Report:

This report focuses on the Nuclear Valves in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

The global nuclear valves sales is estimated to reach about 1161.5 K Units by the end of 2017, which is expected to get 2048.7 K Units in 2022. Overall, the nuclear valves products performance is positive with the current environment status.

Currently, there are many producing companies in the nuclear valves industry. The main market players internationally are Velan, Emerson (including Pentair Valves & Controls, Fisher Brand and etc.), Copes-Vulcan (SPX FLOW), IMI Nuclear, Henry Pratt, Samshin, Daher-Vanatome, KSB, BNL, Babcock Valves, Vector Valves and etc. Players in China like Jiangsu Shentong Valve, Zhonghe SuFa and Neway Valve are growing fast and achieve more and more nuclear valve orders from overseas market.

Europe is the biggest production areas for nuclear valves, taking about 26.34% market share in 2016 (based on revenue). North America followed the second, with about 24.85% market share in 2016 (based on revenue). In Consumption market, sales of nuclear valve in China will increases to 385.2 K Units in 2017 from 124.5 K Units in 2012, which is the biggest consumption area in current market pattern. Europe ranks

the second largest consumption area, with sales volume and market share of 164.7 K Units and 18.13% in 2016.

There are many different types of nuclear valves. Based on construction, the market can be segmented into: Globe Valve, Ball Valve, Butterfly Valves, Gate Valves, Diaphragm Valves and etc. Globe Valve and Diaphragm Valves are the most commonly used types, with market share of 28.89% and 24.45% separately in 2016 (based on revenue).

In the past few years, the price of nuclear valves show an increasing trend and we expect the price may keep the trend in a short period. However, the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of nuclear valves. Therefore, to some extent, the companies are facing a risk of profit decline.

There are companies adding capacities and aiming at the cost and quality leadership which shall improve profitability. At the same time, companies are focusing on technological innovation, equipment upgrades, and process improvements, to reduce costs and improve quality. The total competition in the market for nuclear valves will become more weakened, while the market is going to be more concentrated for high end nuclear valves.

The worldwide market for Nuclear Valves is expected to grow at a CAGR of roughly 12.2% over the next five years, will reach 6980 million US\$ in 2023, from 3500 million US\$ in 2017, according to a new report by Global Info Research (Global Info Research) study.
