## Abstracts

Nylon adhesion improver is an additive used to improve the adhesion properties of nylon materials. Nylon is a common synthetic polymer with good strength and wear resistance, but its surface adhesion properties are generally poor and it is difficult to effectively bond with other materials. Therefore, nylon adhesion improvers are often introduced into nylon materials to improve the adhesion properties of their surfaces and make them easier to bond with other materials.

According to our (Global Info Research) latest study, the global Nylon Adhesion Improvers market size was valued at US\$ million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of %during review period.
