According to our (Global Info Research) latest study, the global Nylon String Trimmer Line market size was valued at USD 167.7 million in 2023 and is forecast to a readjusted size of USD 197.9 million by 2030 with a CAGR of 2.4% during review period.

Nylon String Trimmer Line is the String Trimmer Line made from nylon material. Most trimmers operate with an industry-standard cutting line. This line is most often made from a hardened, monofilament nylon line. These cutting lines range in diameter, which tells users how durable the lines are; the thicker the line, the less it will break. However, thicker line will require more engine power to whip the head around at a fast enough speed to cut through the blades of grasses and weeds. Nylon is the typical material used in trimmer lines. They are synthetic, hardened monofilaments that can be used for almost all weed-cutting tasks. It also makes a great trimming line if you use the correct line diameter and shape. Trimmer lines made of nylon make a perfect gardening tool for beginners and professionals alike. Many trimmer manufacturers also make a nylon trimmer that's reinforced with some other kind of material. Other nylon lines are reinforced internally to prevent them from breaking off as easily. Sometimes, trimmer manufacturers will mold a small amount of aluminum into the nylon line to reinforce the outer nylon material. Other line manufacturers will use composite nylon materials to reinforce their cutting line. Another option uses a polymer added to the nylon for even more reinforcement.

Global Nylon String Trimmer Line key players include Speed, Mazzaferro, Rotary (Desert&Maxpower), Blount (Oregon), Yao I, etc. Global top five manufacturers hold a share about 65%. North America is the largest market, with a share about 45%,
