The global Oakmoss Absolute market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Oakmoss absolute is a natural aromatic extract derived from a specific type of lichen known as *Evernia prunastri*. Lichens are symbiotic organisms composed of a fungus and an alga or cyanobacterium. Oakmoss lichen is found growing on the branches and trunks of oak trees and other deciduous trees in specific regions.

To obtain oakmoss absolute, the lichen is harvested, and then a solvent extraction process is used to extract the aromatic compounds from the plant material. The resulting extract is a thick, dark green to brownish liquid with a rich and earthy aroma.

Oakmoss absolute is widely used in the perfume industry as a fragrance ingredient. It is especially valued for its unique and complex scent, which is often described as mossy, woody, earthy, and slightly sweet. The aroma of oakmoss absolute is known for its depth and tenacity, making it an excellent base note in many perfumes.
