Abstracts

The global Ocean Data Acquisition System market size is expected to reach \$ 630 million by 2032, rising at a market growth of 4.7% CAGR during the forecast period (2026-2032).

Ocean Data Acquisition System refers to an integrated system used to collect, transmit, store, and analyze marine environmental, oceanographic, geophysical, and underwater operational data. It typically consists of sensors, data loggers, buoys, underwater platforms, communication modules, power supply units, and software platforms, and can monitor parameters such as temperature, salinity, pressure, current velocity, wave height, tide level, dissolved oxygen, pH, turbidity, seabed conditions, and acoustic signals. These systems are widely used in ocean observation, offshore energy, marine research, environmental monitoring, fisheries, port management, underwater vehicles, and defense applications. In 2025, global Ocean Data Acquisition System production reached approximately 8169 units with an average global market price of around 49.3 k USD/unit. The production capacity for Ocean Data Acquisition System in 2025 was approximately 10000 units. The typical gross profit margin for Ocean Data Acquisition System is between 20% and 40%.

The Ocean Data Acquisition System market is expanding steadily, driven by increasing demand for marine environmental monitoring, offshore wind and oil & gas development, climate change research, ocean resource exploration, smart ports, and maritime security. As ocean operations become more digital and automated, customers require systems with higher sensor accuracy, real-time communication, long-term underwater reliability, low-power operation, and integrated data platforms. Growth is particularly strong in offshore renewable energy, autonomous underwater vehicles, coastal monitoring networks, and deep-sea exploration, while challenges include high

deployment cost, harsh marine environments, maintenance difficulty, and data transmission limitations.

This report studies the global Ocean Data Acquisition System production, demand, key manufacturers, and key regions.
