## Abstracts

The global Octadecenylsuccinic Anhydride (ODSA) market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Octadecenylsuccinic Anhydride (ODSA) is a long-chain olefinic dicarboxylic anhydride and is one of the raw materials for advanced lubricants and surfactants. The ODSA market refers to the market for this organic compound.

ODSA has good surface activity and hydrophilic properties and can be used as a raw material for the production of lubricants, antistatic agents, coatings, resins, and other chemicals. It can improve the dispersibility and stability of chemicals and enhance the performance and quality of products.

The driving factors for the ODSA market include the acceleration of industrialization processes, growth in the manufacturing industry, and an increase in demand for lubricants and surfactants. In the industrial sector, ODSA is widely used in the production of various lubricants, metalworking fluids, and gear oils. In the chemical industry, ODSA can be used as a surfactant and emulsifier and is applied in the preparation of products such as paints, coatings, and resins.
