According to our (Global Info Research) latest study, the global Octyl Salicylate market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Octyl salicylate also known as 2- ethylhexylsalycylate, octisalate and benzoic acid among others is an organic compound. Octyl salicylate is an ester that is produced through the condensation of a salicylic acid with 2-ethylhexanol. Octyl salicylate is primarily a colorless or a pale yellow with a slight floral odor.

Asia Pacific is expected to be the fastest growing market in terms of demand in the cosmetic industry. The shift in the lifestyle of consumers and the growing health awareness in the region coupled with the growing disposable income of consumers are expected to boost the cosmetic market in the Asia Pacific region, which in turn is expected to drive the market for octyl salicylate during the projected period. Various cosmetic and sunscreen manufacturers have been trying to set up production and distribution facilities in emerging Asia Pacific countries especially India and China to cater to the rising demand of consumers. Asia Pacific is anticipated to be the most attractive market for the cosmetic industry in the near future. Consequently, this is anticipated to boost the market for octyl salicylate during the projected period.
